

# Fibre Optic Cabling

## Connectix IP68 External Drop Terminal Enclosure (DTC)

This IP68 External Drop Termination Closure (DTC) offers a compact size and a rugged exterior that is designed to allow for installation in tight spaces without compromising functionality. Four corner ports provide flexibility during installation. Called the Coyote DTC, this is ideal for quick restoration of damaged, diverse routed or cut fibre service drops or last mile FTTH applications.

### Features and Benefits

- Utilises a Splice Block System which permits single fusion, mass fusion, mechanical, PLC splitters, or a combination of all within one closure
- Factory-installed gasket allows re-entry and re-use
- Internal organiser manages buffer tube or ribbon cables
- Snap together design is quick to assemble, no special tools required
- Designed and tested in accordance to Telcordia® GR-771-CORE buried, underground, IP68 rated requirements

### Specifications

Splice Capacity (Maximum) - Single Fusion, Ribbon	24, 36
Cable Ports	4
Cable Diameters	4.3 - 9.4mm and Flat Drop
Configuration	In-Lin or Butt
Application	Direct Bury, Below Grade, Pole/Wall, Aerial
Ingress Protection	In accordance to TELECORDIA GR-771-CORE, Buried, Underground, IP68
Size	L231 x W193 x D43mm
