

# Angled Keystone Patch Panel

The Connectix 24 Way Unloaded Angled Keystone Panel offers enhanced patch lead management in any style of cabinet. The patent pending design naturally sweeps patch leads to the side of the racking, without the panel protruding beyond the rack or cabinet profiles. Supplied unloaded, the unshielded patch panel accepts Category 6 or

Category 5e high performance Keystone Modules, while the shielded version accepts 10G high performance Keystone Modules. For the optimum in on-site installation efficiency, Connectix Express Pre-Terminated and Pre-Tested assemblies can be used.

## Features & Benefits

- Integrated rear management tray to support cabling with individual cable tie positions
- The 24-way Unshielded Angled Keystone Panel offers a high-density design and the capability for Category 6 & Category 5e data transmission performance levels
- The 24 way Shielded Keystone Panel offers high density and the capability for 10G data transmission performance levels

Product Specifications		
Width (mm)		483 (19")
Depth (mm)		130
Height (mm)		44.45
Material		Mild Steel
Finish	Front	Fine textured black paint
	Rear	Bright zinc plate
