

Y-Block

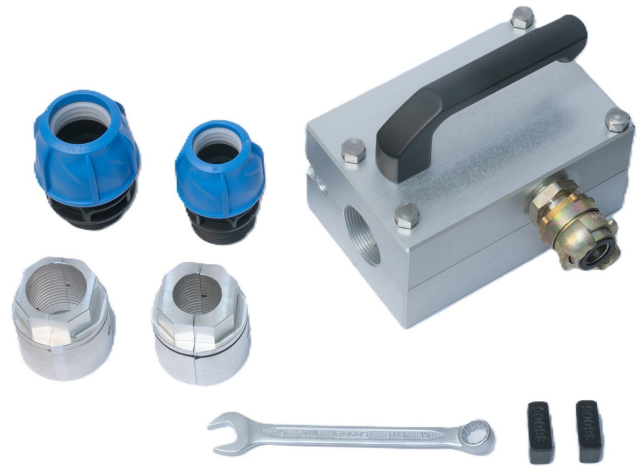

The Y-Block is a specialised accessory for fiber installations, allowing the addition of a second and third fiber cable or duct into existing duct systems without disturbing the existing infrastructure. It supports cable sizes up to 16mm and 12mm.

A 25mm or 50mm pipe connects the fiber blowing machine to the Y-Block, which also features an extra direct air connection for installations in larger ducts or pipes.

The connection to the fiber blowing machine is replaceable, providing flexibility for different setups and requirements. The Y-Block kit is equipped with clamps that adapt to different duct sizes, ensuring compatibility with a range of installations.

Features & Benefits

- Parallel installation of multiple cables or ducts
- Interchangeable connection
- Flexible connections
- Compact design for tight spaces
- Lightweight and practical design
- Can also be used to blow ducts (instead of cables) into existing ducts

Standard Y-Block Kit Contains

- Jetting Y-Block
- Two aluminum clamps (32mm and 40mm)
- Two Plastic Duct Connectors (32mm and 40mm)
- Block wrench
- Seals for the Y-Block

Product Specifications	
Case Dimensions (W x H x D)	460 x 170 x 360 / 18 x 7 x 14 in
Case Weight	Approx 10kg / 22lbs
Cable Dimensions	Max Ø16mm and Ø12mm cables
Standard Clamps	25-32-40-50mm
Connection to Fiber Blower	25-32-40-50mm
