

LUNA SP Customer Demarcation Box

The LUNA Customer Demarcation Box is designed for outside applications, allowing to delineate customer premises in FTTH networks.

With a high-capacity storage, this enclosure is the solution for preconnected cables. Adapted to all application methods, benefit either from LC or SC/APC adapters.

Compact and design, the LUNA CDB offers up to 8 drop cables inputs/ outputs and brings you the ability to create 2 backside outputs to insert the subscriber.

Thanks to its inner part made of recycled ABS, this product has a lower environmental manufacturing impact.
